ABOUT US

Rebirth Clinics

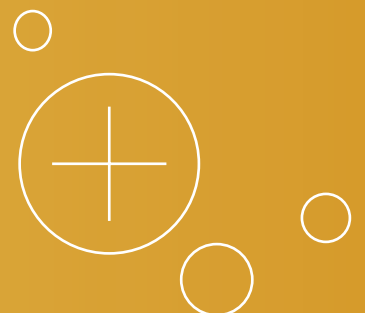

Rebirth Clinics is a groundbreaking medical institute dedicated to transforming the landscape of advanced medical rejuvenation therapies using fresh Umbilical cord stem cells and IV treatments. As a leader in the regenerative medicine and the cellular therapy industry, Rebirth specialises in physician training certification, stem cell products and IV therapies, with its lead product, fresh umbilical cord stem cells.

Science has given us an amazing gift with stem cells; they are providing us with answers to medical challenges that have remained beyond our grasp for too long. At Rebirth, we fully embrace this gift, as there are so many diseases that can now be cured, and so many people suffering who can now be helped, it's good business and it's good medicine, not only for sick people but also for people that want to live longer and happier lives.

ABOUT US

InUWell

The Institute of Universal Wellcare (InUWell) is the first of its kind: a digitally immersed, multidisciplinary institute of holistic health and well-being in a warm and welcoming retail environment. InUWell offers an unparalleled experience that is a seamless blend of physical and digital realms, designed to embrace the holistic nature of individuals' well-being, emphasising the intricate interplay of biological, social and psychological facets.

It provides a diverse range of services including DNA genetic testing, comprehensive health screenings and diagnostics, specialised treatments and therapies, wellcare lifestyle products and services, active health studios, multi-sensory immersive experiences, and a digital health bank.

Imagine a world where every man, woman and child has the agency over three valuable assets: their health, time and money. At InUWell we are helping to shape the future of health and wellcare practices in Africa and globally, with the purpose of enhancing the well-being of countless individuals.

Dr Kamlen Pillay
CEO, InUversal Group

OUR HISTORY AND EXPERTISE

Rebirth Clinics is at the forefront of stem cell research and development. Our team of renowned scientists has made groundbreaking contributions to the field of stem cell biology, with pioneering publications that have shaped the industry. With our expertise, we are dedicated to advancing the potential of stem cell therapy for a wide range of degenerative and genetic diseases.

At Rebirth, we are dedicated to providing revolutionary stem cell-based therapies to individuals suffering from degenerative or genetic diseases worldwide. With a team of leading scientists and pioneering publications in the field of stem cell biology, we are at the forefront of developing advanced technologies that have the potential to transform lives.

With our personalised approach, we strive to improve your quality of life and provide long-lasting results. We believe in the immense potential of regenerative medicine in treating conditions that were once considered incurable.

Our commitment to excellence is unparalleled as we exclusively utilise fresh umbilical cord tissue for our stem cell production. Backed by scientific research, we can confidently say that fresh tissue outshines cryopreserved alternatives. With higher cell counts, superior recovery ratios, and faster growth attributes, our fresh stem cells set the benchmark for quality in the global market.

At Rebirth, we exclusively use fresh umbilical cord tissue for the production of our stem cells. Fresh is considered superior to cryopreserved (frozen) tissue when harvesting stem cells. Frozen umbilical cord tissue yields lower cell counts, shows poor cell recovery ratios, and is shown to have slower growth attributes. The fresh stem cells we offer are the highest quality available in the global market today.

OUR SCIENCE AND STEM CELLS

SCIENTIFIC PROCESS

We prioritise the selection of the finest passage cell line for your stem cell needs, following stem cell isolation, we proceed with carefully culturing the cells to expand their numbers. We exclusively opt only for primary cell culture, which represents the earliest stage of cell growth. Moreover, we got the extra mile by handpicking only the best early passage cells. This meticulous selection process ensures that you receive stem cells of unparalleled quality. Rest assured, we are committed to providing you with the absolute best of the best when it comes to stem cell quality and performance

FRESH, NOT FROZEN

Ensuring that we provide effective and reliable medicine is a meticulous and extensive process. Fresh is considered superior to cryopreserved (frozen) cord tissue when it comes to harvesting stem cells. Frozen cord tissue often yields lower cell counts, exhibits poor cell recovery rates, and displays slower growth characteristics. That's why we exclusively utilise fresh cord tissue for

the production of our stem cells for treatment.

HIGHEST QUALITY CELLS

Behind the scenes, we delve into scientific intricacies to ensure our stem cells are of the highest quality. We pay meticulous attention to every detail to maximise effectiveness and safety, employing xeno-free culture materials. allow us to achieve remarkable results without requiring an excessively large number of cells.

Stem cells differ from other cells in the body in three ways:

1. They can divide and renew themselves over a long time
2. They are unspecialised, so they cannot do specific functions in the body.
3. They have the potential to become specialised cells, such as muscle cells, blood cells, and brain cells

ABOUT STEM CELLS

Stem cells are natural healers that we all possess since birth.

Just imagine if you were to get a cut. Your body doesn't need any instructions to fix and heal it. It does so by utilising the power of stem cells. After an injury, local stem cells in the vicinity and those present in the bloodstream migrate to the injured area through a process called homing. They then begin their work of cell replication and repair,

“Rebirth Clinics & InUWell partnership marks a pivotal moment in advancing healthcare accessibility across Africa.

Stem cell therapy represents not just a treatment, but a beacon of hope for countless individuals seeking relief from medical challenges. Together, we stride towards an innovative future making a profound impact, one life at a time.”

Dr. Kamlen Pillay
CEO of the InUversal Group

allowing your skin to progress through different stages of wound healing and eventually return to its normal state. This exemplifies the incredible function of stem cells.

Throughout our bodies, cell death and injury occur constantly. Stem cells act as diligent soldiers, serving us without any recognition, and eventually perishing in their service. They silently carry out their best work to ensure the overall functioning of our bodies. For instance, when we engage in sports and accidentally injure the cartilage of our knee, stem cells arrive to repair the damage. If we consume excessive amounts of salmon and accumulate mercury, which can be toxic to our kidney cells, stem cells step in to fix the issue. Even when we subject our lungs to various toxins from smoking cigarettes, stem cells play a crucial role in repairing the damaged lung cells.

This remarkable ability to naturally heal and maintain our body's functionality is the fundamental purpose of stem cells.

Find out if you are a candidate for treatment.

APPLY TODAY

HOW DO I APPLY TO BECOME A PATIENT?

To start your evaluation, please email us at rebirth@inugrp.com to complete a Patient Application form. If you still have questions, please feel free to contact us at +27 21 465 6557.

APPLY NOW

HOW LONG WILL IT TAKE TO GET AN APPOINTMENT?

Once our medical team has received your medical application, it usually takes one or two working days (but no longer than five working days) to review it. If you are conditionally approved for treatment, we will contact you to discuss available treatment options and to request medical records.

Once fully approved, you may schedule your treatment. The further out you wish to schedule your appointments, the more likely it is that you can have your preferred dates. In most cases, if you request treatment dates several weeks in advance, we should be able to accommodate you.

If you are not approved for treatment based upon your medical history, you will be notified by email.

HOW MUCH DOES THIS TREATMENT COST?

Rebirth Clinics also provide regenerative therapies including NAD+, Brain Peptides, Multi Vitamins, Immune Boosters and more with fees for services starting from \$29,750 USD for adults and children.

Cost depends on the recommended treatment protocol and will be given to you in writing upon approval. We also offer Comprehensive packages that include luxury hotel accommodation, full concierge and butler service, daily breakfast, complimentary WiFi and seamless airport transfers, starting from \$7,000 and varying according to the season.

If you would like a cost estimate for a particular treatment, please contact us. One of our Ambassadors will be happy to assist you.

WHAT CAN I EXPECT FROM TREATMENT?

Begin your journey to a healthier life through advanced stem cell therapy.

1. APPLY TODAY

Our evaluation process is designed to determine if you are a candidate for stem cell treatment. Our doctors will evaluate your application and medical history, and let you know if you are eligible.

We will then recommend a unique course of treatment to meet your needs and begin the scheduling process.

[START APPLICATION](#)

2. RECEIVE TREATMENT

Once you have submitted all requested medical information and received approval, our patient coordinators will contact you to schedule your treatment in Cape Town, South Africa.

Upon arrival, our medical staff will conduct a physical evaluation and administer your stem cell treatment over the course of your stay.

HOW ARE THE STEM CELLS ADMINISTERED?

At Rebirth @ TALI, stem cells are administered several ways depending on each patient's ailment and physical condition. Patients typically receive a minimum of 3 stem cell applications during the course of an entire treatment protocol. Methods of administration include: Intravenous (IV), intramuscular, intrathecal, perilymphatic, and ultrasound-guided intra-articular.

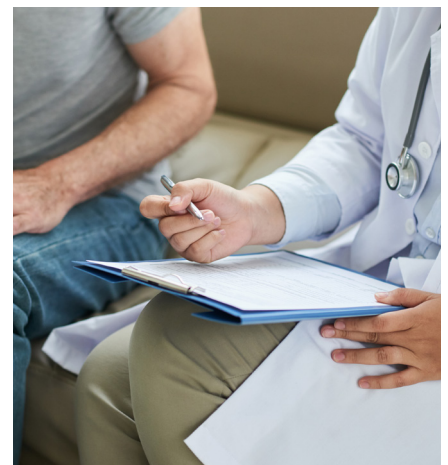

WHAT IS THE TREATMENT PROTOCOL FOR MY CONDITION AND HOW LONG DOES IT TAKE?

Treatment protocols vary by disease. Each patient's physical condition and other medical factors also play roles. Most protocols last for 3–5 days and consist of 3–4 sessions.

Your recommended protocol may differ from the example given below:

- Visit length: 5 nights
- Physical examination and blood testing: Day 1
- 3 intravenous infusions of specially selected, human umbilical cord tissue-derived allogeneic mesenchymal stem cells: Days 2 – 4
- 1 intra-articular knee injection on Day 2

3. FOLLOW UP

After you return home, our medical team will continue to partner with you on your health journey. We will follow up with you at regular intervals to monitor your progress, offer support, and answer your questions.

HOW LONG WILL IT TAKE TO SEE RESULTS?

Each patient is unique, and there is no guarantee that positive results will be seen or how quickly they may be observed. Some patients have reported improvements during the course of their treatment, while others have experienced improvements as long as 6 months after returning home. However, as with any drug or medical procedure, not all patients improve.

TRAVELLING TO CAPE TOWN

One of the biggest perks to travelling for stem cell treatment is the opportunity to experience a new place. Cape Town, South Africa, is a beautiful destination filled with something interesting for everyone.

Rich in heritage with the breathtaking Table Mountain as your backdrop, you can enjoy delicious food, gorgeous art and a captivating culture in addition to your overall experience as a stem cell patient.

Your stem cell treatments can include a fully-inclusive package with the following offer:

- Our VIP Patient Experience
- Convenient & Comfortable Stay at the One&Only Cape Town
- Our Highly-Esteemed Clinic
- The Beauty & History of Cape Town

When you step off your flight in Cape Town, a concierge will arrange for a member of the team to escort you from the airport to the One&Only Cape Town where they will have everything set up for a quick and easy check-in process.

Our treatment center is conveniently located just a short distance from One&Only in the V&A Waterfront, where you will receive a unique treatment designed just for you and your health needs.

Cape Town is a vibrant city where you'll feel energised and inspired, possibly even discovering a new home away from home.

CONDITIONS WE TREAT

As a global leader in regenerative therapy, we have successfully treated thousands of patients. Our main areas of focus include:

AUTISM

Children with autism often experience diminished oxygenation in the brain and chronic inflammation in the gut. One of the mechanisms by which stem cell treatments for autism may help alleviate symptoms is by decreasing systemic inflammation.

AUTOIMMUNE DISEASES

Stem cell therapy provides hope for patients with autoimmune disorders such as Hashimoto's disease, Crohn's disease, and ulcerative colitis.

“No words to describe how amazing this clinic is. Stem Cell therapy has immensely helped me physically and mentally. This is instant gratification where I have had injuries in my leg, hands and it was gone. I sleep better and in general I have no pain in bones, joints. I highly recommend them as their ingredients are very high end. They are also great to discuss issues with and they only advise on what you “need” which is amazing. They genuinely care for your well being. I fly just to do treatments here. I have also recommended friends as I can see how I have healed!”

Noreen Hasan

HEART FAILURE

Stem cells have the ability to not only home into the damaged areas, but also to initiate a cascade of biological events, both of which may culminate in healing of the heart muscle.

CEREBRAL PALSY

Stem cells have the potential to stimulate repair of damaged nervous system tissue in the brain, which can lead to improvements in patients with cerebral palsy.

MULTIPLE SCLEROSIS

Stem cells have the potential to inhibit the immune system from attacking the myelin sheath, which causes MS symptoms.

“I had Vitamin drips, PRP, and NAD therapy here. They use the same brands/ quality ingredients that I would use back home for a fraction of the price sold in the United States. Could not be happier with the results. I sleep less, have more energy, and my skin/hair looks great. Extremely friendly and professional staff. I have been to this clinic over 10 times and my experience has always been a good. I would highly recommend this clinic to anyone looking for cosmetic or anti-ageing related therapies.”

Corey Nast

OSTEOARTHRITIS

Osteoarthritis is a degenerative disease that affects the body's joints, causing tenderness, pain, swelling, and stiffness. Stem cell therapy has helped many of our patients relieve these symptoms.

RHEUMATOID ARTHRITIS

Many rheumatoid arthritis patients have experienced improvements after receiving stem cells to reduce inflammation and pain.

PAIN MANAGEMENT

Our stem cell therapies can help accelerate and promote the healing of bone and tendon injuries.

[WATCH NOW](#)

“You can get those stem cells that are 4 days old, they have the force of life - that’s what makes a baby grow so quickly. There are so many breakthroughs, you can heal in days instead of weeks or months.”

Tony Robbins, American author, coach, speaker, philanthropist

ANTI-AGEING AND WELLNESS

At Rebirth @ TALI, NAD+ IV infusion therapy is available for a number of anti-ageing and wellness needs. NAD (nicotinamide adenine dinucleotide), is a naturally occurring coenzyme crucial for cellular energy and repair; is vital for overall health. NAD IV therapy administers NAD directly into the bloodstream via IV, ensuring rapid absorption and bypassing the digestive system. With NAD+ Infusion treatment, you can fuel your body's energy factories and mitochondria, unleashing a surge of vitality and stamina.

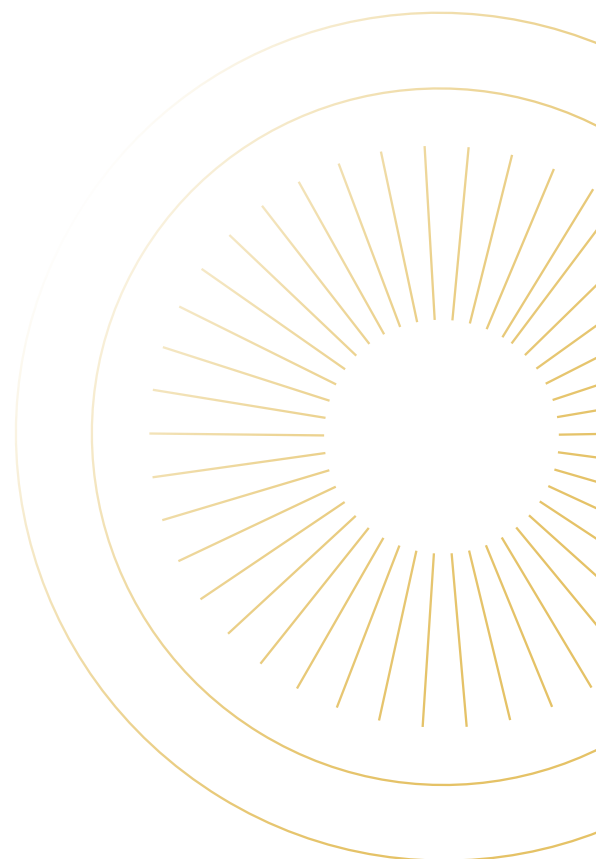

Emerging research has also highlighted several ways NAD IV therapy can assist in addiction recovery, easing withdrawal symptoms and reducing cravings. By regulating

neurotransmitters, NAD therapy can help diminish cravings for addictive substances, aiding in resisting relapse triggers. It is a popular treatment for people looking to quit smoking. Overall, NAD IV therapy enhances overall health by contributing to cellular repair and immune function which is beneficial for those whose physical health has been impacted by addiction.

"I did stem cell rejuvenation here. The service is fantastic. The doctor took great care of me and is very expert. The location is wonderful too. Highly recommended. Very clean and safe. I have been a customer for many years. See you again soon. Wasana."

Jing Joh

ATHLETIC PERFORMANCE

Recommended for:

- Post work-out recovery and soreness
- Getting ready for sporting events – (Triathlons, Marathons, Football)
- Post performance fatigue recovery
- Lactic Acid build up

“Extinguish soreness and fatigue from intense athletic events of any kind.

Bolster athletic performance and gain a fair, competitive advantage.”
